

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest a monoclonal antibody for use in detection and identification of fetal red blood cells and their nucleated precursor cells, the monoclonal antibody 1) having specific reactivity to a cell surface antigen present only on fetal red blood cells (fetal RBCs) and their nucleated precursor cells (fetal nRBCs) identified and described in Applicant's disclosure as MAb 4B8 and MAb 4B9; 2) the cell surface antigen that the monoclonal antibodies bind being distinct from CD71 cell surface antigen or transferrin receptor which is expressed in fetal RBCs and fetal nRBCs; and 3) the cell surface antigen being absent in other fetal non-erythroid blood cells and adult erythroid and non-erythroid blood cells.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
